DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Perrson (5,133,428).

With respect to Claims 1 and 2, Perrson teaches a speaker mounting ring (Figure 2, #14) in which a speaker (12) is affixed, that fits into a housing (13) in a manner to allow angular and circular movement (Col. 6, Lines 28-34); constructed of a semi-pliable material to allow modification for mounting of various speaker sizes and types, and installation of the device into various enclosures (Col. 8, Lines 22-32); the device is to be used for aiming speakers at a listener's ears in any listening environment, such as an automobile. (Col 2, Lines 23-27)

With respect to Claims 3 and 4, Perrson teaches wherein a speaker (Figure 2, #12) mounted to the speaker mounting ring (14) can be manually adjusted by means of rotating or angling the speaker mounting ring within the housing, and can be fixed to the housing to hold speaker mounting ring firmly in place (Col 6, Lines 25-38).

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pertinent arts of record relating to adjustable speaker mounts are disclosed in the PTO-892.
